

All donor applicants are required to complete a medical and genetic family history record. Each applicant is evaluated by two physicians including a board certified clinical geneticist. Applicants with a family history or any condition that would increase the risk of transmission of a genetic illness to their offspring are NEVER accepted as donors.

Semen specimens from each donor are tested for infectious diseases. Every donor is serologically tested for Hepatitis B surface antigen and core antibody, Hepatitis C antibody, syphilis, SGOT, SGPT, HTLV-I, and HIV (AIDS). Jewish, Mediterranean and Black applicants are tested for Tay Sachs, thalassemia and sickle cell anemia respectively. All applicants have full chromosome analysis and are tested for cystic fibrosis with a new DNA-based test. Donors are tested for AIDS every 30 days and all semen specimens are quarantined 6 months before release.

DONOR# 762 PROFILE

RACE: Cauc	BLOOD TYPE: O+	ETHNIC BACKGROUND: German/English
HEIGHT: 6-1	WEIGHT: 185	BONE STRUCTURE: Medium
SKIN TONE: Fair	EYE COLOR: Blue	HAIR COLOR/TYPE: Brown/Straight
COLLEGE YRS: 5	OCCUPATION: BA History	INTERESTS: Sports/Travel/Outdoors

MEDICAL & GENETIC HISTORY PROFILE

Donor History:

GLASSES: Yes	ALLERGIES: Erythromycin	DENTAL PROBLEMS: None
HEARING PROBLEMS: None		DIET RESTRICTIONS: None
