If you have special needs, such as samples from races different from the above, please feel free to call and discuss your needs with us. Also, if the samples that you obtain are not of satisfactory quality, please let us know. From time to time, any donor will give a sample that will look good initially, but may not thaw well. If possible, it is better to have us thaw the sample so that a minimum standard of quality can be assured. We will send a slip with the sample showing the motility upon thawing.
